Want to learn more about sleep technology or train to become an RPSGT? Join us for a comprehensive 7-day course at our training facility in Atlanta.

A-STEP: Essentials of Sleep Medicine

The A-STEP curriculum was developed by the American Academy of Sleep Medicine as a comprehensive introduction to sleep technology for the novice technologist. This course is also great for allied healthcare professionals who are new to sleep medicine or those who may benefit from a formalized course of study in the field.

The Atlanta School of Sleep Medicine offers the first 24 hours of the course as interactive online lessons. The A-STEP student can study at their own pace in the comfort of their home or office during the month before their 56 hour LIVE course begins.

Course Curriculum:

- Introduction to the sleep lab
- Words you need to know: medical terminology
- Preparation for the sleep study
- Sleep 101
- The international 10-20 system of EEG Electrode Placement
- Recording the sleep study
- Monitoring respiration during a sleep study
- Treatment protocols
- Common sleep disorders
- Age-appropriate patient care
- Responsibilities when working with patients
- Patient set-up practice
- Scoring practice
- And much more!

Credits: 58.50 contact hours. Continuing Respiratory Care Education (CRCE) credits approved by the American Association for Respiratory Care.

Cost: $3300 includes online portion, live class, course manual, and 2-months free access to Online Sleep Tech Exam Prep.

To register, visit www.sleepschool.com or call 678-651-2000
